

THE INSTANT MESSAGING SOLUTION

"QuickConference is a headache-free Instant Messenger and it's a godsend for small offices."

— MacHome Magazine

FOR MAC AND WINDOWS NETWORKS

Need an answer fast? Need to get a message to someone immediately? Sometimes e-mail isn't fast enough. It doesn't always make sense to drop everything and run into another office to deliver a message. A phone call works sometimes, but what if the person you need to reach is on the phone? And it isn't always convenient to wait for a response via e-mail. So what's the solution? QuickConference.

Why QuickConference?

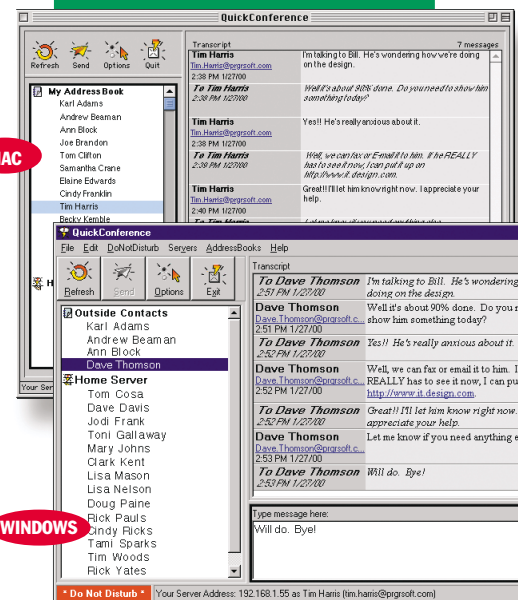

QuickConference can pop a message up on your screen in an instant. You can send back the appropriate response immediately. No interrupted phone calls, no dropping everything to walk down the hall to another office, and no waiting on e-mail. QuickConference gets results without wasting time. Instant messaging saves you time and money. Your best choice in conferencing is QuickConference.

QuickConference provides instant communication to networked users of Microsoft's Windows 95 or greater, Windows NT 4.0 or greater and Apple's Mac OS. It solves the inter-office communication problems facing your business each day. With QuickConference,

everyone in your company can discuss important issues and answer questions within minutes, not hours. Best of all, unlike other instant messaging products, QuickConference can be used by organizations with, or without a connection to the Internet.

Communication at it's finest

Whether it's your supplier, shipper or corporate headquarters, QuickConference can get your message through fast. Business partners that use QuickConference can now communicate with each other. It's instant, and it's easy. There is no need to try to search for suppliers and partners when you need to make a change to an order, or when you need a quick answer. Just select your partners' server and ask your question directly. It's quick and secure with QuickConference.

QuickConference Product Features

- ▶ **Multi-user Log in:** Log in to QuickConference from any computer.
- ▶ **Address Book:** Create lists of users and place them in a group for quick and easy access.
- ▶ **Transcript Log:** Keep records of conversations for archiving.
